

E-FUEL GLOBAL NETWORK On-guard 24x7, Worldwide

The E-Fuel Global Network (EGN) is a required subscription service for operation of the [MicroFueler™](#). The EGN ensures the MicroFueler and associated peripherals are operating at maximum efficiency, 24 hours a day, 7 days a week. Should a condition arise which requires attention, E-Fuel technicians in our monitoring facility diagnose the issue and initiate a fix remotely when possible. If needed, an email alert is sent to you or your dealer. With real-time access to over 40 controls in the MicroFueler, our technicians can switch pumps and motors on and off, vary pump speeds, tune temperature settings, initiate clean-in-place (CIP) procedures and download software updates for your specific feed-stock situation. The EGN also produces accurate and detailed monthly reports of your fuel production which allows qualified customers access to potential tax credits, incentives and proof of carbon reduction.

- *24x7 operational monitoring of the MicroFueler*

- *EGN monitoring ensures the E-FEUL100 ethanol meets ASTM specifications in support of E-Fuel's warranty against damage to your fuel system (see [E-Fuel Warranty Statement](#) for details)*

- *Remedial maintenance procedures to correct situations on-the-fly without user intervention*

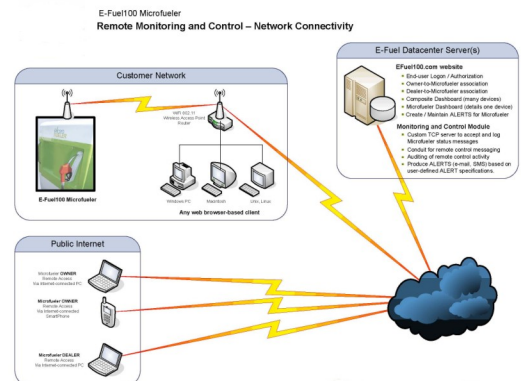

- *From any browser or Smart-phone, subscribers may login at E-Fuel's web site to gain access to the EGN and view your MicroFueler's Dashboard with real-time status information presented in an easy to read graphical interface*

- *Software updates to keep the MicroFueler at peak performance*

- *Condition reporting and email alerts automatically sent to the distribution list set by you and your dealer*

- *Monthly reports showing system production and billing*

- *EGN connects through the internet* using Wi-Fi or hard wire interface (optional data cell or satellite). See the [E-Fuel Global Network Subscriber Agreement](#) for details.*
